

Don't Delay Care

Our Medical Practices are Still Open!

Everyday medical issues don't take a break during pandemics and it's very important to address any health issues while they're minor rather than having them turn into a more serious situation.

We are actively evaluating already-scheduled appointments – converting most to online video or telephone appointments – and we can do the same with any immediate health concerns you or your family members may have.

Please don't wait! Reach out to our office if you need us. We have several options to treat you without you having to come into the office. And in the instance where we feel it's vital that you *do* come into the office, rest assured that we have taken every precaution to keep you safe.

Your provider will decide whether a telephone call, online video visit or in-office visit is most appropriate for your situation. Healthcare insurers are now covering telemedicine (online video) visits to help you maintain access to care during the pandemic.

Our Physician Practices are here to support the health and well-being of our community during this difficult time. Again, we are eager to meet your needs and especially eager to head off any health concerns that have the potential of worsening if care is delayed.

We are here for you!

We Specialize in You
